Specifications are subject to change without notice in the interest of product improvement

NEXT Level *SOLUTION*

FATEK IoT

FATEK IoT offers innovative IIoT solutions for cost-effective, rapid, and intuitive device connectivity.

It enables remote dashboards, project maintenance, and integrated data analysis—featuring GPS tracking, alarms, and historical trends for total operational control.

FATEK IoT boosts efficiency and provides a scalable foundation for digital operations, accelerating your transition to smart manufacturing.

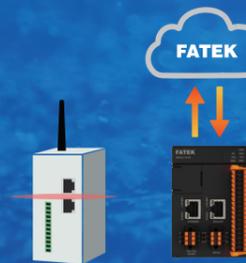

*Remote Maintenance
Without Gateway and Module*

FATEK IoT leverages data to boost performance and productivity, ensuring precise equipment control to drive sustainable growth.

WHY FATEK?

Manage Everything, Anywhere

Remotely **Monitor, Maintain, Update,** and **Troubleshoot** global devices from anywhere. Eliminate travel for on-site support and bring efficiency to your fingertips.

IoT READY: No Gateway Required

Start instantly without extra IoT gateways. FATEK PLCs and HMIs feature built-in IoT, enabling applications in a time-saving, labor-saving, and cost-effective way.

How FATEK IoT Makes Your Day

iMONITOR

Monitoring of globally distributed devices through a centralized dashboard for instant operational insights.

iACCESS

Effortless remote updates and maintenance.
Live screen monitoring without on-site visits.

iLOCATION

Real-time location visibility.
GPS integration for precise management.

iMONITOR

The iMonitor IoT service enables monitoring and collection of distributed device data world-wide. Regardless of data volume or complexity, it presents information through an intuitive browser-based platform, allowing comprehensive control from any location.

Monitor x Data Log x Alarm x Trend Location

Learn more with Video

Dashboard

Monitor multi-device data with custom dashboards. Configurable gauges, sliders, buttons, and indicators.

Data Collection & Cloud Database

Securely collect and store data with full historical export available anytime.

Alarm Notifications

Real-time alerts via SMS, Email, or App.

Trend

Trend charts for historical & real-time data. Intuitive analysis and comparison of data changes.

Dashboard

Beyond Boundaries, Data Always Online

Boundless Data, Total Control

- Visualized Cloud Data Collection
- Instant Alarm Notifications via APP/Email

FATEK IoT SOLUTION Your One-Stop IoT Control Platform

Dashboard

Complete Dashboard Widgets

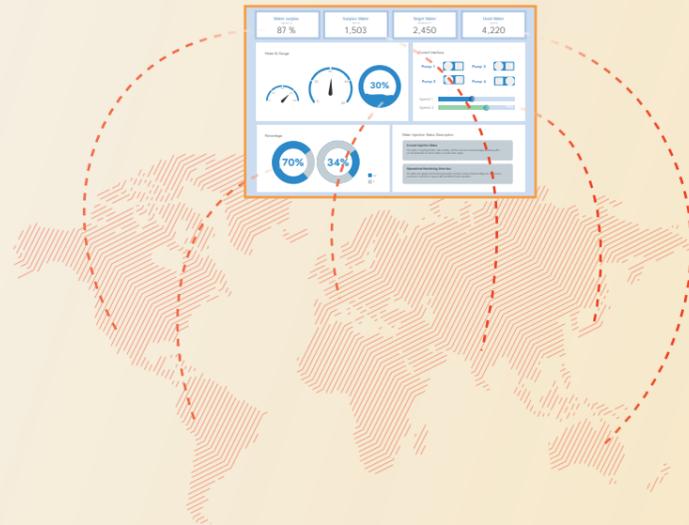

Data at a Glance

FATEK IoT SOLUTION

Total Device Control at Your Fingertips

Monitor global devices via a single dashboard. Centralize complex data into one clear view for effortless, total control anytime, anywhere.

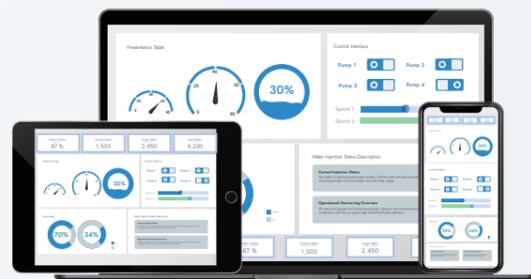

Sharing & Access Control

Use sub-accounts to securely share dashboards for flexible teamwork. Granular permissions for individual components prevent unauthorized access, maximizing management and collaboration efficiency.

Cross-Platform Compatibility

Supports Browser/Android/iOS. Customize layouts for PC, Mobile, and Tablets with adjustable resolutions for an optimized, device-specific experience.

Real-Time Sync & Collaboration

Seamlessly link dashboards across browsers and apps. All status changes or parameter updates sync instantly to every terminal. This integrated cloud platform ensures precise and high-efficiency remote teamwork.

iLOCATION

iLocation IoT services can clearly display devices and locations on the map. A dynamic update feature is also supported, thus further achieving dynamic tracking and trajectory tracking applications. The map display method ensures more intuitive device monitoring and substantively enhances group management efficiency.

Location x Positioning x Tracking

Device Location

Support manual GPS entry or external modules. Map-based display for effortless device management.

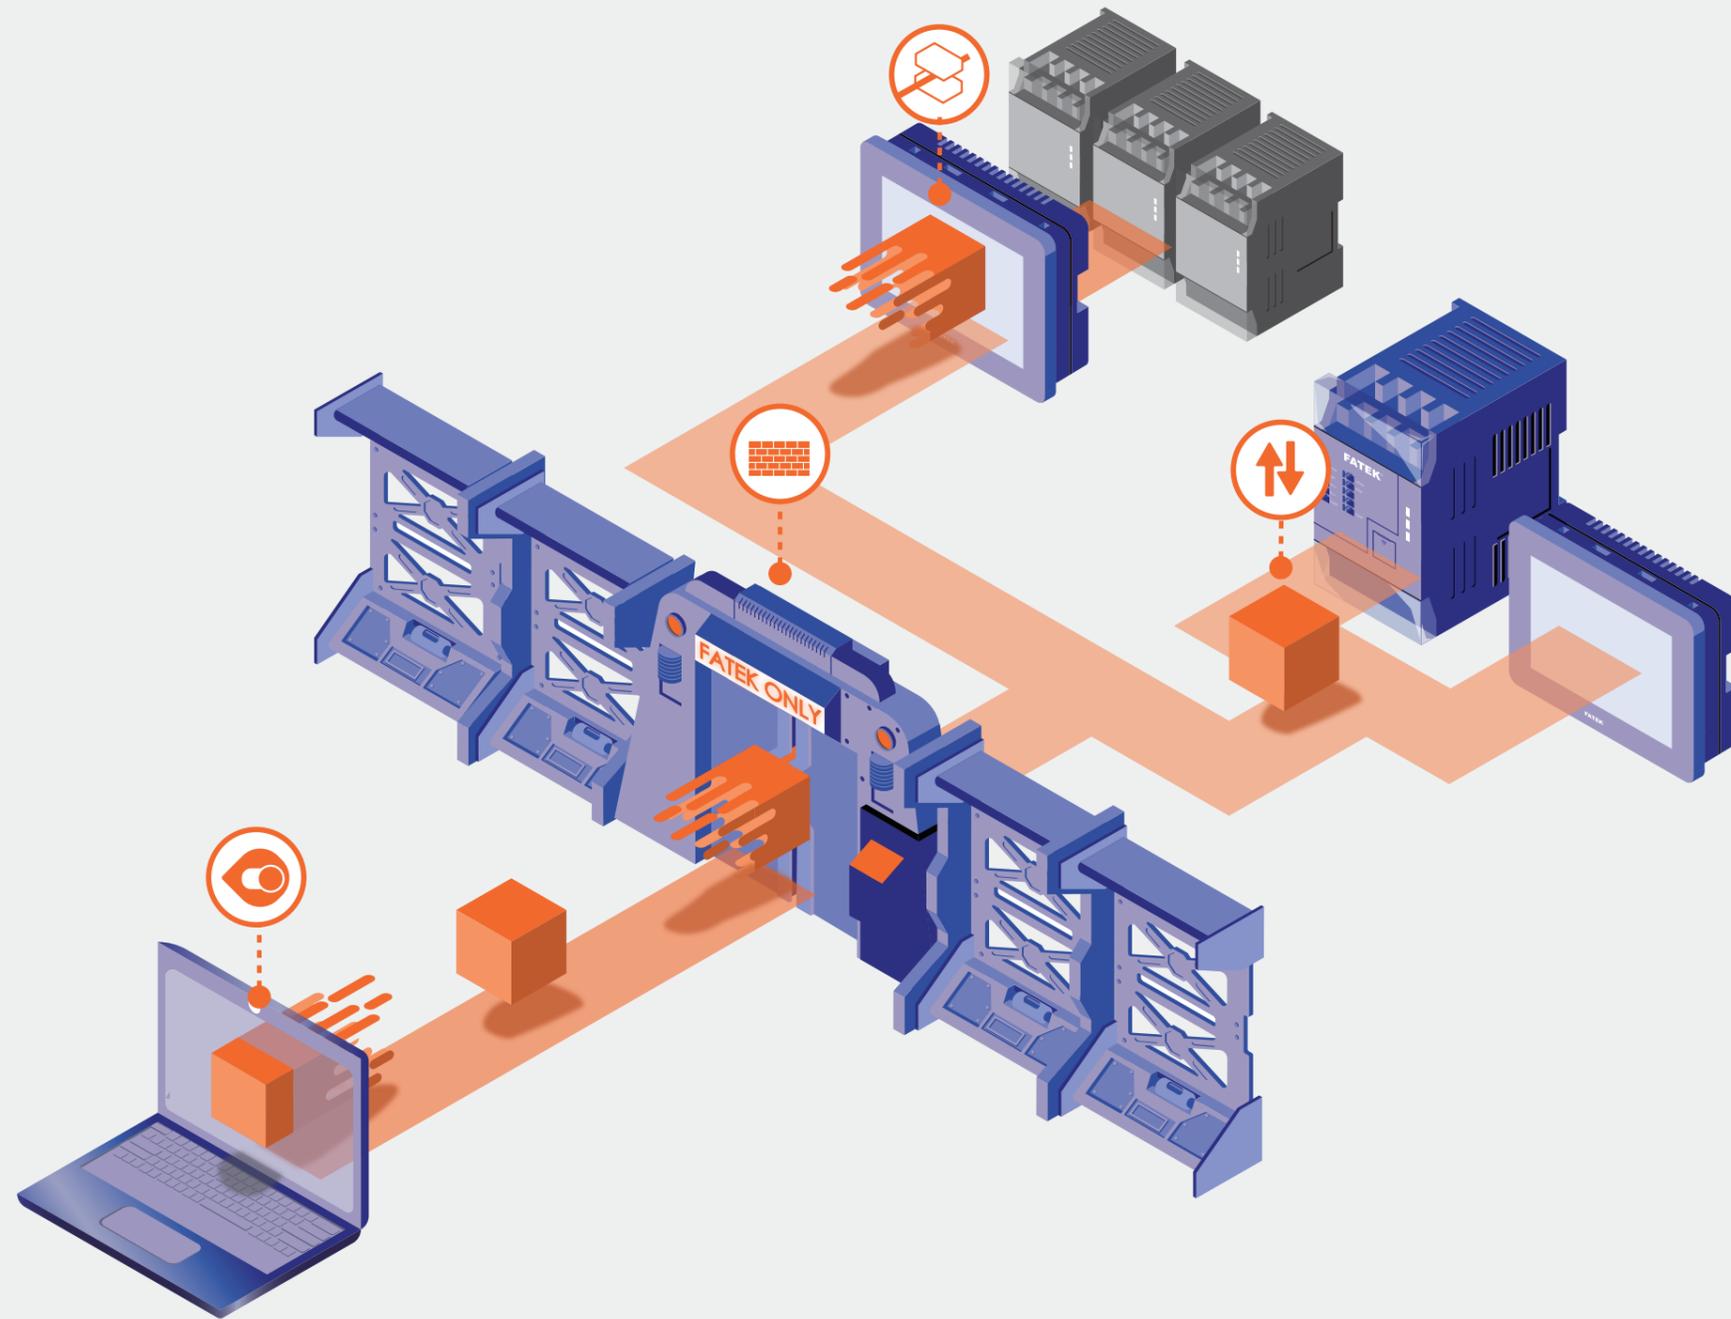

Dynamic Tracking

Real-time GPS map updates to support dynamic tracking and trajectory needs.

Unrestricted Deployment

Supports Wi-Fi/4G/Ethernet to eliminate physical wiring constraints, enabling tracking and monitoring anywhere.

iACCESS

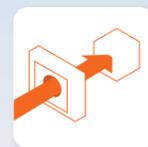

iAccess IoT Service enables complete and secure control/maintenance of remote devices across complex firewall and router configurations. It brings globally distributed devices to your fingertips, eliminating geographical barriers.

Maintenance x Screen Monitoring x Passthrough

Project Maintenance

Upload/Download/OS Update
Easily and safely maintain the project and system

Passthrough

Easily maintain PLC projects of various brands

File Transfer

Easily transfer and read files to remote devices

Screen Monitoring

Display and control the HMI screen in real-time

Comprehensive Remote Operation & Maintenance

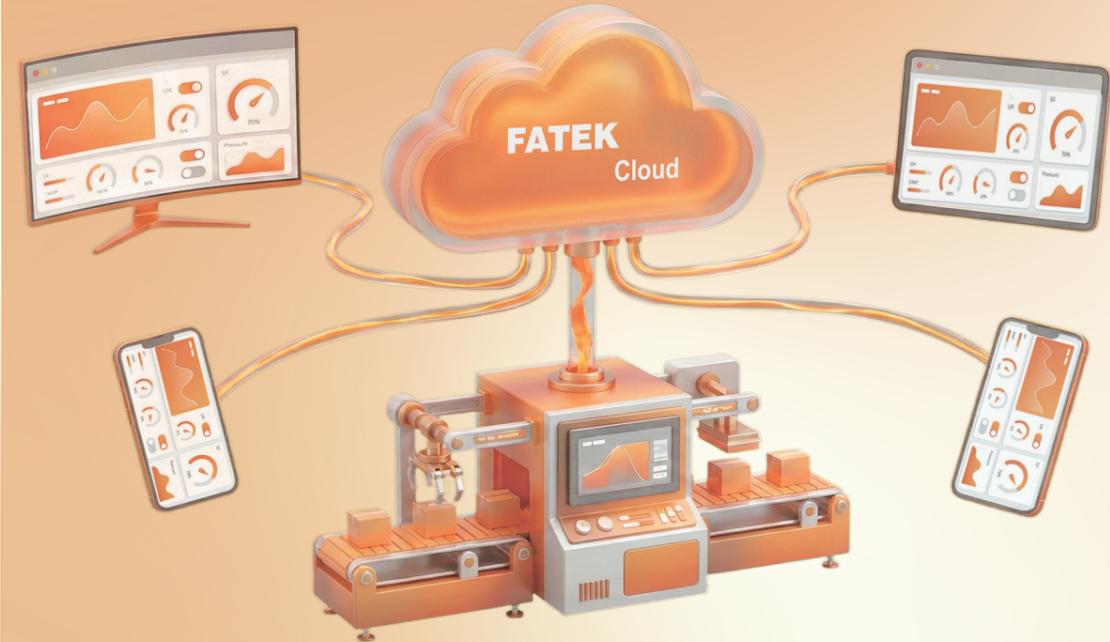

Maintenance Without On-Site Visits

- Remote Cross-Platform Screen Monitoring
- Remote HMI & PLC Program Upload/Download
- Pass-Through Maintenance for Various PLCs

FATEK IoT SOLUTION Your One-Stop IoT Control Platform

Cross-Platform Monitoring

Control Devices Anywhere

Your One-Stop IoT Control Platform **FATEK IoT SOLUTION**

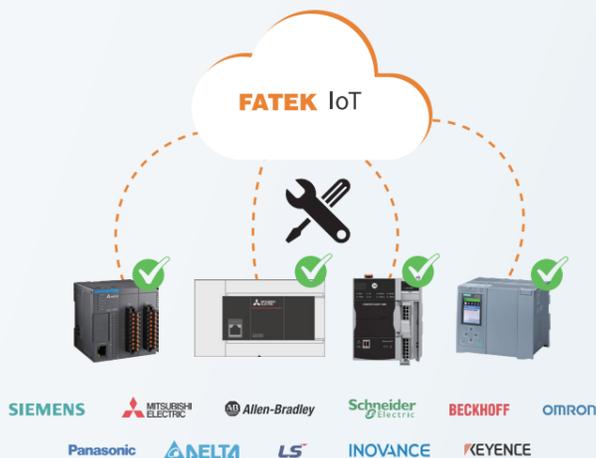

Project Maintenance

Supports remote updates and debugging for HMI and PLC programs. Engineers can perform remote maintenance without on-site visits, significantly reducing travel costs and time spent on after-sales service.

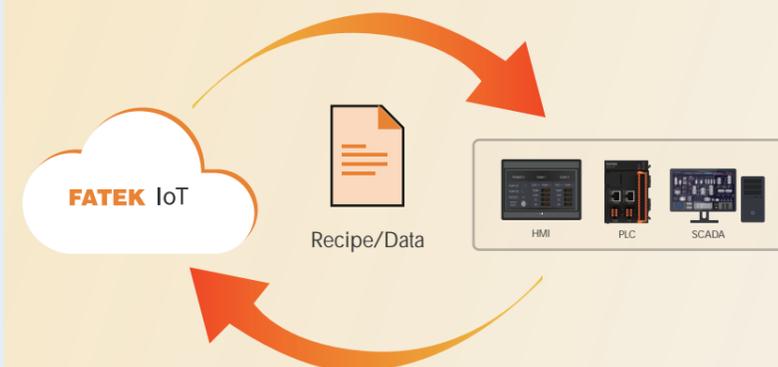

Cross-Platform Monitoring

Breaks device limitations with support for PC, iPad, iPhone, and Android terminals. View HMI screens in real-time without tedious VNC settings, ensuring smooth remote equipment monitoring.

Multi-brand PLC Project Maintenance

Features powerful communication pass-through capabilities, allowing direct access and maintenance of third-party PLC programs via the HMI. This ensures the convenience of a single entry point for comprehensive management.

File Transfer

Supports remote two-way file transfer. Files can be saved directly to the device, facilitating easy remote recipe replacements and data updates to enhance process flexibility.

Architecture

Screen Monitoring

Real-time viewing of HMI screens on mobile devices, PCs, tablets, and other terminals, enabling remote visualization of equipment status.

Alarm Push Notifications

Instant alerts and HMI screens pushed via App, SMS, or Email during equipment anomalies.

API Integration

APIs for third-party integration. FATEK IoT manages all field-to-cloud connectivity. Simply interface with FATEK Cloud for secure data access without complex communication setups.

RESTful API

FATEK IoT

Multi-Brand PLC Maintenance

Leveraging FATEK HMI passthrough, remotely upload/download and maintain third-party PLC projects for high-efficiency remote support.

Data Collection & Analysis

Flexible scheduling automatically transforms historical data into intuitive trend charts and visual reports. One-click CSV export ensures fast, efficient data analysis and comparison.

LINK By **FATEK IoT**

FATEK IoT Driver

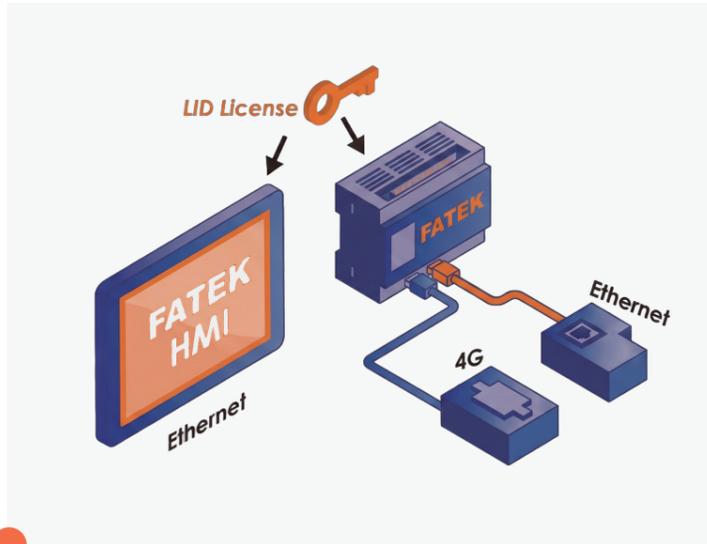

Seamlessly link devices anywhere for real-time data exchange. Break distance barriers to boost management and collaboration efficiency.

Easy, Fast, and Secure Deployment

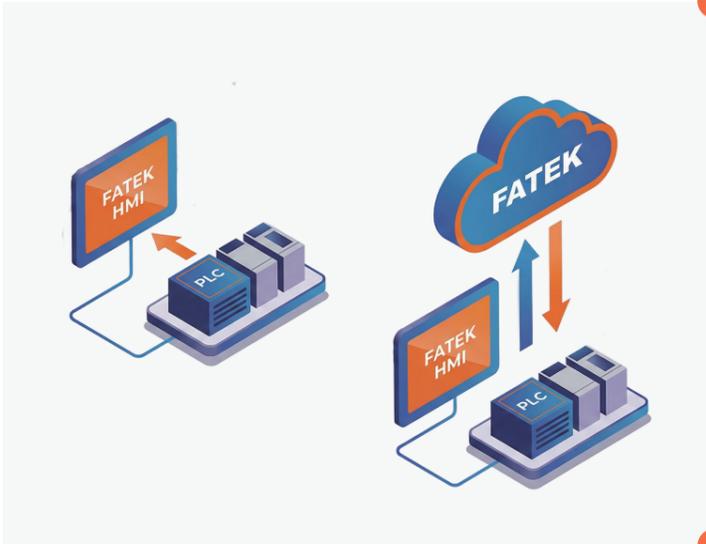

Easy IoT Setup, Ready in No Time

- ▶ **No extra Gateways or Modules required**
FATEK devices are IoT READY with built-in hardware. Simply activate to deploy IoT applications instantly—reducing costs while eliminating complex network configurations and setups.
- ▶ **On-Demand Activation**
Just use an activation key to start your IoT journey instantly. FATEK makes IoT implementation simple, fast, and highly efficient.

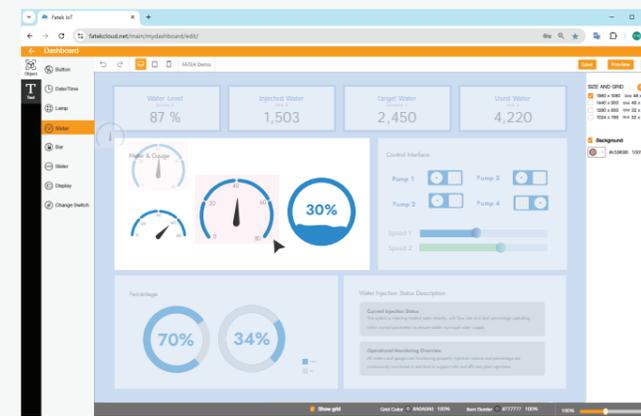

Anywhere, Anytime

- ▶ **Fast Connectivity One-Click Remote Access**
From the office, home, or on the move—simply log in to your FATEK IoT account to master production data and manage equipment instantly.
- ▶ **Hassle-Free Networking**
Connect via Wired, Wi-Fi, or 4G without fixed IPs, firewall adjustments, or complex router setups. Remote management made effortless.

Seamless Integration, Zero Replacement

- ▶ **No System Adjustments Needed**
Simply add a FATEK device to deploy IoT instantly. Upgrade legacy or non-networked equipment without production stops or architectural changes. Realize connectivity and visualization immediately, boosting system value with minimal cost and time.

Installation-Free Browser Operation

- ▶ **Installation-Free Browser Operation**
Complete all planning and configuration online via browser. Instant access with no additional software required, allowing flexible system adjustments anytime, anywhere for maximum convenience.
- ▶ **Zero Device Project Changes**
No modifications needed for remote device projects. Configure directly via the browser for instant results.

Full Cross-Platform Compatibility

- ▶ **Multi-Device Support**
Compatible with Browsers, Android, and iOS to meet the needs of diverse users and scenarios.
- ▶ **High Operational Flexibility**
Monitor and manage devices anytime, anywhere via PC, tablet, or smartphone. Free your workflow from hardware limits.

Secure & Reliable Connectivity

- ▶ **End-to-End Data & Cloud Protection**
SSL/TLS encryption secures data flow between devices, the cloud, and users, protecting sensitive information and control commands.
- ▶ **Smart Setup, Minimized Risk**
Automated handling of IP, firewall, and router settings eliminates security risks from human error, ensuring a stable and leak-proof network architecture.

Water Injection Status Description

Current Injection Status

The system is injecting treated water steadily, with flow rate and level percentage operating within normal parameters to ensure stable municipal water supply.

Operational Monitoring Overview

All meters and gauges are functioning properly. Injection volume and percentage are continuously monitored in real time to support safe and efficient plant operation.

[Operation]
Select data, device locations, and dashboard views.

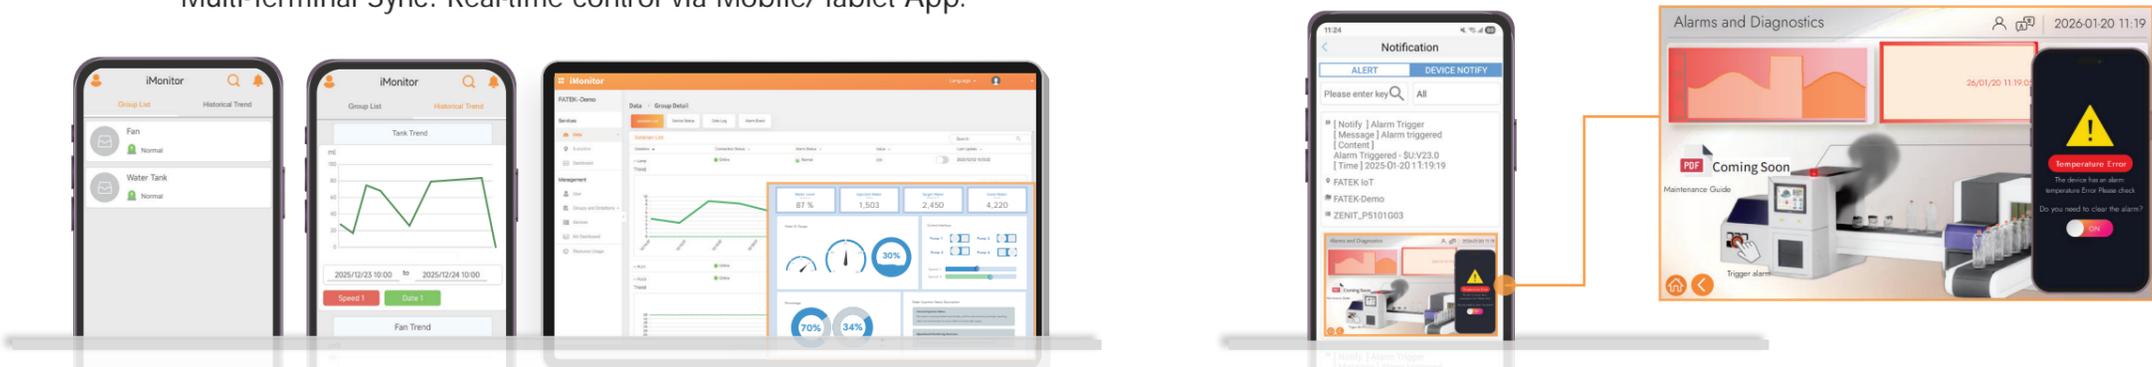

[Management]
Manage users, data settings, devices, and dashboards.

[Data]
View or control specific data points.

[Language]
Supports EN/CHT/CHS to suit global users.

[Dashboard]
Custom views to monitor multi-site device data simultaneously.

Multi-Terminal Sync: Real-time control via Mobile/Tablet App.

FATEK Cloud Alarm Notifications

Multi-platform alarm notifications

Live operation screen snapshots

The screenshot shows the iLocation interface. On the left is a sidebar menu with various site locations. The main area features a map of Sydney with several blue location pins. Below the map is a data table for the selected site, 'Factory - Campsie'.

Switch between data info for different equipment.

[Data]
View real-time data for the selected device.

[Map Preview]
Intuitive view of current device locations.

Static Mode

Set location by manually entering GPS coordinates

Dynamic Mode

Use a GPS module to display real-time location and track the device

The screenshot shows the iAccess web interface. On the left is a sidebar menu with sections: Services (Data, iLocation), Management (User, Groups and Dataltems, Devices, Connect Log), and Resource Usage. The main area is titled 'Data' and contains a 'Device Group List' table. The table has columns for Device, Product Type, Model Name, and iAccess Status. A specific device 'ZENIT_P5101G033' is highlighted. To the right of the table are three numbered callouts: 1, 2, and 3. At the top right, there is a 'Language' dropdown and a user profile 'IoT Demo'.

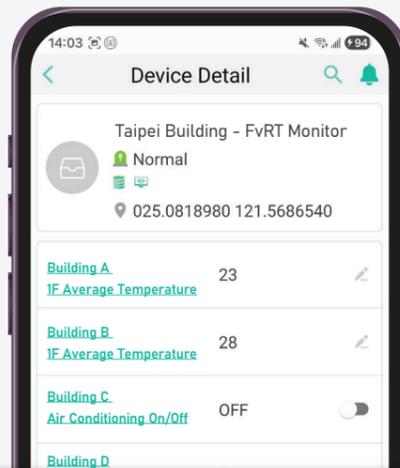

[Operation]
Quick selection for data and locations.

[Management]
Manage users, settings, devices, and logs.

[Data]
View or control specific data points.

[Language]
Supports EN/CHT/CHS to suit global users.

Distributed Monitoring System

[Food Production Line]
Centralized Factory Monitoring System

[Vertical Packaging Machine]
Maintenance for Exported Machinery

[Dashboard]

Real-time Visualized Production Metrics. Data insights for precise executive decision-making.

[iLocation]

Precise Global Device Tracking. Streamline cross-regional asset management and dispatch.

[Alarm Notifications]

Instant Anomaly Push Alerts. Multi-terminal sync ensures zero-lag response.

[Big Data Analytics]

Cloud-to-third-party data integration. Optimize production parameters to maximize capacity.

[On-site Video Monitoring]

with WebCAM. 24/7 security for field operations.

[Multi-brand PLC Maintenance]

High cross-brand compatibility. Achieve one-stop remote maintenance and management

[System Optimization]

Remote Cloud Updates. Keep system features always up-to-date

[Troubleshooting]

Rapid Fault Diagnosis. Remote guidance significantly reduces equipment downtime.

Step 1: Account Activation

Before starting your IoT journey, please apply for the service through your FATEK distributor.

You will receive an activation email—please click the link within 7 days to activate your account.

- ◆ One account can be bound to multiple devices.

Step 2: Device System IoT Settings

Access the IoT settings page on your device (HMI/PLC) and check "Enable IoT Service."

- ◆ Note down the Hardware ID (HWID) displayed on the screen; this is the unique identifier for device.
- ◆ Enter a custom Service Password :

Step 3: Binding Device HWID

Highly Recommended!

Method A : Web Cloud Management Binding

Log in to the FATEK cloud portal. Go to "Device Library" and enter the Service Password and HWID of your device.

- ◆ Service Password :
- ◆ Hardware ID :

Method B : App Scan-and-Sync

HWID, Service Password, will be automatically filled. Complete the binding with just one click.

Step 4: Setting Device LID

(iAccess only; skip this step for iMonitor)

Method A : Direct Configuration on Device

Enter the device system settings page, and input your purchased iAccess LID code.

- ◆ Distinguish between '0' (zero) and 'O' (letter); there are no zeros (0) in an LID.
- ◆ Once activated, the LID is bound to the HWID and cannot be reused for other devices.

Method B : Configuration via FATEK IoT App

Switch to the iAccess page and select "Edit" for the device. Scan the QR code on the LID license card, and the LID will be automatically entered into the device.

- ◆ "Remote LID Setting" is only available when the device is online.
- ◆ Once activated, the LID is bound to the HWID and cannot be reused for other devices.

Step 5: Status Inspection

Connection Status: Check if the device IoT setting displays a "Green" status icon.

Green is Connection is normal, Red is Connection error.

Click the icon to view detailed error messages.

Normal | Error

View Error messages

Category	Item	Model	Specification
iMonitor	Project Device Activation Fee (per device)	IOTIMON-ACT	One-time activation fee per device for adding a monitoring device to an IoT project. Activation units are selected based on the number of monitored devices. Not device-bound, replaceable, with no expiration or recurring fees. Monitoring traffic, data collection, and alarm storage are not included.
	Monitoring Data Traffic Expansion	IOTIMON-DT-05GB	Expand monitoring data transmission by 5GB, with no expiration.
		IOTIMON-DT-20GB	Expand monitoring data transmission by 20GB, with no expiration.
	Data Log Storage Expansion	IOTIMON-DLOG-1000K	Expand data log storage capacity by 1000K records, with no expiration.
	Alarm Log Storage Expansion	IOTIMON-ALOG-1000K	Expand alarm log storage capacity by 1000Krecords, with no expiration.
iAccess	Alarm Notification SMS Top-Up	IOT-SMS-100	iMonitor alarm notification SMS package: 100 messages, with no expiration.
		IOT-SMS-200	iMonitor alarm notification SMS package: 200 messages, with no expiration.
		IOT-SMS-500	iMonitor alarm notification SMS package: 500 messages, with no expiration.
iAccess	Remote Project Maintenance & HMI Monitoring License	IOTIACE-V	Remote project maintenance (supports third-party PLC projects ^{*1}) HMI screen monitoring, and file transfer. The license has no expiration and requires one license per device ^{*2} .
	Remote Project Maintenance License	IOTIACE-0	Remote project maintenance (supports third-party PLC projects ^{*1}) and file transfer. The license has no expiration and requires one license per device ^{*2} .

*1 Supports pass-through mode, enabling remote upload and download of third-party PLC projects.

*2 Once the license key is bound to a device, it cannot be transferred to another device.

※ The traffic usage calculation mechanism is scheduled to launch in Q3 2026.

Usage-based calculation and billing will apply only after the mechanism is officially implemented.

※ For the terms of service and privacy policy of FATEK IoT, please refer to the information on the official FATEK website.
